PROFESSIONAL SUMMARY

Web Developer with hands-on experience maintaining school websites and portals, building responsive and user-friendly web systems, and optimizing performance across production environments. Proficient in HTML, CSS, JavaScript, PHP, and CodeIgniter, with a strong foundation in troubleshooting, website maintenance, and responsive design. Applies AI-assisted development tools responsibly to improve debugging, documentation, and workflow efficiency, while consistently validating code for accuracy, security, and maintainability.

WORK EXPERIENCE

St. Dominic College of Asia
Web Development Engineer

2024 – Present
Bacoor, Cavite

- Manage and maintain the school website and student portal, ensuring consistent uptime and a seamless experience for students, faculty, and staff.
- Develop and optimize features including student registration, grade tracking, and course management modules to improve system usability and efficiency.
- Implement security updates and perform regular troubleshooting to maintain website reliability and data integrity.
- Improved page load performance by approximately 20% through targeted front-end optimizations, contributing to better user experience.
- Collaborate with cross-functional teams to gather requirements and deliver web solutions that meet institutional needs.

Cavite State University CCAT Campus – Capstone
Lead Programmer

2023
Rosario, Cavite

- Led end-to-end development of the CCAT Scholarship Portal: A Web-Based Application System for Students, designed to streamline scholarship applications and management.
- Designed and built a user-friendly scholarship portal interface to improve application accessibility, usability, and student submission workflow.
- Conducted thorough functional and usability testing to ensure system reliability and readiness for institutional deployment.
- Coordinated with faculty and stakeholders to gather feedback and align the system with academic requirements and user expectations.

Cavite State University CCAT Campus
IT Intern – Research and Extension Services Office

2023
Rosario, Cavite

- Completed 486 hours of on-the-job training, providing technical and administrative support to the Research and Extension Services Office.
- Automated email replies using Google Forms, reducing manual communication workload and improving office response time by approximately 40%.
- Organized and digitized past graduate theses to improve document accessibility and retrieval for future students and researchers.

LEEN Tech Network Solutions
IT Support Intern

2019
Tanza, Cavite

- Provided hands-on technical support over 3 weeks, troubleshooting hardware and software issues for clients.
- Performed remote diagnostics and system analyses, documenting solutions for internal knowledge base and future reference.
- Identified recurring issue root causes and proposed corrective measures to strengthen support protocols.
